EXPERIENCE

Software Developer
Lumber

01/2021 - Present
Development firm

- Building the front-end of various e-commerce sites using React, Gatsby, Contentful, and GraphQL
- Working directly with clients throughout the development and deployment stages of their sites to ensure their needs are being met
- Occasionally working with Shopify Liquid code and ThemeKit
- Increased team's efficiency by creating a better development workflow
- Ensuring cross-browser compatibility and responsiveness for multiple displays

Junior Software Developer
COC Games

01/2021 - 05/2021
Web hosted party games

- Created a web version of the popular game Cards Against Humanity using React and Node.js
- Agile/Scrum workflow, participated in bi-weekly sprints
- Reviewed code of other team members
- Planned and implemented the functionality of loading states in the application, and wrote documentation
- Tested components using React Testing Library and Jest
- Set up routes and controllers in the back-end using Node.js
- Implemented various components using Context and styled-components

TOOLS / PROGRAMS

Git | npm | webpack | Firebase | Contentful

Visual Studio Code | Adobe XD | After Effects

Photoshop | Figma | Shopify | Heroku

PERSONAL PROJECTS

Cards of Carousal (01/2021 - 05/2021)
- Created a Jackbox-style version of Cards Against Humanity
- A fully functional web hosted party game using React, Node.js, and WebSocket
- View live site: https://www.cardsofcarousal.com/ ↗

PC Part Planner - Express / MongoDB Inventory App (10/2020 - 12/2020)
- Users are able to plan out the parts needed to build a PC
- Database: MongoDB, Back-end: Node.js / Express
- Cookies are used to save user selections
- View live site: https://pcpartplanner.herokuapp.com/list ↗

Breddit - A Reddit Clone - CRUD Application (08/2020)
- Includes core features of Reddit
- Created using React (with React Router) and mobile-first design
- Firebase used for authentication, database, and storage
- View live site: https://reddit-clone-a7ea1.web.app/ ↗

SKILLS

React	JavaScript
Proficient	*Proficient*
CSS / Sass	HTML
Proficient	*Proficient*
Node.js	Redux/Context
Working knowledge	*Working knowledge*
Express	JQuery
Working knowledge	*Working knowledge*
Bootstrap	Shopify Liquid
Working knowledge	*Working knowledge*
REST APIs	GraphQL
Working knowledge	*Working knowledge*
Unit Testing / Test-Driven Development	MongoDB
Working knowledge	*Working knowledge*
Rails	
Past experience	

RELEVANT COURSEWORK

Computer Science
University of Toronto

09/2017 - 11/2019
9.0 credits completed

- Introduction to Computer Programming
- Introduction to Computer Science
- Software Design
- Introduction to the Theory of Computation
- Computer Organization
